Directors Message

Division of Fire Safety Gathers in Montpelier To Honor Student Artists

On Friday, November 6th, 2015 the Division of Fire safety held its 2016 Fire Safety Calendar Program. With assistance from the Commissioner of Public Safety Keith Flynn and the Director of the Division of Fire Safety Mike Desrochers the Division celebrated the 25th anniversary of this very successful fire safety education program. “Sparky” the Fire Dog and Smokey Bear were also present to greet and congratulate the participants. The Division recognized 27 students for their artful creations that will be included in the 2016 calendar. During the ceremony, 14 students were presented with honorable mention certificates and gifts and 13 students were presented with winner’s certificates, gifts and special edition Vermont Teddy Bears. The Vermont Teddy Bears were clad in their own firefighter turnout gear, which included the Division of Fire Safety patch.

Continued:

During the program, the Division of Fire Safety also made two special presentations in honor of the 25th Anniversary:

- Retired Deputy Director Robert Howe was honored for his creation and dedication to the calendar program for the past 25 years. Robert was unable to make it to the program, however his daughter, Andrea Fas-set, accepted on his behalf, a framed poster depicting the covers from the past 25 years of the calendar program and a special edition Vermont Teddy Bear. The name of the program was officially changed that day to **“The Robert Howe Fire Safety Calendar”** by declaration and gubernatorial proclamation.

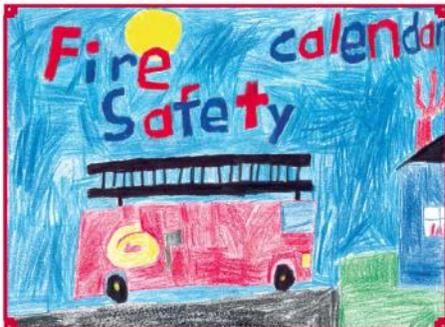

- Larry Brown, from L Brown & Sons Printing, Inc., was also honored for years of support and dedication to the program. Larry was presented a plaque of appreciation and a special edition Vermont Teddy Bear.

The Division staff will be distributing the calendars as soon as possible to all the third graders and should anyone like their own calendar, please contact your local Division of Fire Safety Regional Office.

**25TH ANNUAL
ROBERT HOWE FIRE SAFETY CALENDAR
— 2016 —**

A Statewide Fire Safety Program presented by the Vermont Division of Fire Safety

JARED PRESEAU
Wells Village School, Wells, VT
Mrs. Galliani, Teacher

**State of Vermont
Executive Department
A Proclamation**

WHEREAS, quality public fire prevention programs directly affect the safety and well-being of the residents and visitors of the State of Vermont; and

WHEREAS, these fire prevention programs affect the overall quality of life and are an integral part of the Division of Fire Safety's mission statement in protecting lives and property within the State of Vermont; and

WHEREAS, the Fire Safety Calendar program is annually incorporated with the observance of National Fire Prevention Week; and

WHEREAS, the current Fire Safety Calendar program was created and designed as a collaboration between the Division of Fire Safety and our local schools to incorporate the artwork of third grade students that depict important fire safety messages into calendars that are distributed to thousands of households annually; and

WHEREAS, teachers and fire departments have used the Fire Safety Calendar program to reinforce essential fire prevention and home safety messages resulting in the saving of lives and property; and

WHEREAS, the Fire Safety Calendar program has received financial support from L. Brown & Sons Printing, Inc., the American Fire Sprinkler Association, several state of Vermont Fire Service organizations and associations, as well as numerous other individual sponsors over the past 25 years; and

WHEREAS, the Fire Safety Calendar program was created 25 years ago by Deputy Director (Retired) Robert Howe, with assistance from several dedicated Division Staff members, to reach out and educate the children of our state on the important and invaluable messages of fire safety and fire prevention; and

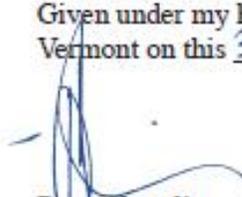

WHEREAS, Deputy Director Howe has made significant contributions to the health and well-being of our communities through his unwavering support for fire safety and fire prevention, and has worked tirelessly to ensure the success of the Fire Safety Calendar program since its inception;

NOW, THEREFORE, I, Peter Shumlin, Governor, do hereby proclaim that as of the 6th day of November 2015 that the Fire Safety Calendar program shall now be officially named the

ROBERT HOWE FIRE SAFETY CALENDAR PROGRAM

in Vermont.

Given under my hand and the Great Seal of the State of Vermont on this 30th day of October, A.D. 2015

Seasonal Fire Safety

PUBLIC EDUCATION RESOURCES

Practice safe cooking this Thanksgiving.

Home cooking fires happen most often on Thanksgiving. Stand by your pan: if you are cooking at high temperatures, turn off the burner before leaving the kitchen.

Heat your home safely.

Keep anything that can burn 3 feet away from a fireplace, wood stove or space heater.

Keep children 3 feet from anything that can get hot.

Space heaters and stovetops can cause terrible burns.

Water your Christmas tree every day.

A dry tree is dangerous because it can catch on fire easily.

Keep snow and ice 3 feet away from fire hydrants.

In case of fire, firefighters need to be able to get to the hydrants quickly to protect people and property.

2015 NFIRS SUBMITTED AND MISSING INCIDENT REPORTS - UPDATE

**N
F
I
R
S**

National Fire Incident Reporting System

Fighting Fire with Facts

**It's Time to Get Your
Reports Up-to-Date!**

NFIRS is the fire service's tool to report its emergency responses. It is the largest incident-based database in the world. Incidents are reported every 1.5 seconds and a fire incident was reported every 25 seconds. The sheer size of this database with more than 35 years of incidents makes it a valuable tool at the local, state, and national levels.

The fire service should be reporting all of its emergency response incidents to NFIRS. The numbers tell the fire service's story, and only the fire service can best tell its story. In our ever-changing world, the fire service's first line of defense is timely accurate information that is shared, integrated, analyzed, and acted upon quickly and effectively. Since NFIRS is becoming more open and visible to its users, the fire service must make it count by caring about its data and sharing its data.

**The deadline for submitting all 2015 reports is
January 19, 2016!**

Fire department reporting is required by state law. And each fire department is required to submit their emergency incident data reports to the Vermont State Fire Marshal's Office in accordance with Vermont Law 20 V.S.A. Section 2833.

The Division of Fire Safety continues to thank those departments that report valid incident reports on a timely bases. These reports are being used at the state and national level to make decisions that will affect public safety and the fire service for years to come.

On our website there will be a report listing the current data entry status of Vermont's fire departments -- if your department is behind please make every effort to get caught up as soon as possible.

For additional Incident Reporting Resources or information please visit:

http://firesafety.vermont.gov/fire_investigation/vfirs/

Please include: Your department name, FDID #, and the account user name. We will reset the account to the default password as soon as possible. Please note, due to the massive volume of phone calls we receive this time of year, we are not able to accept reset requests by phone. An email allows us to re-set you faster.

NFIRS RESETS

In an effort to better support Vermont's departments and to increase the timely resets of NFIRS accounts,

All reset inquiries should now be sent to dps.vfirs@vermont.gov

In your e-mail be sure to include: Your department name, FDID #, and the account user name

Seasonal Fire Safety

Autumn is the beginning of the holiday season, a time when hectic activity distracts many people's attention from fire safety. Holiday decorations, Trees, lights, candles, cooking, and wood stoves all produce extra fire hazards in our homes. Most fires and injuries are preventable and by taking precautions you can make the difference between a happy and safe holiday or a holiday tragedy.

COOKING Safety

Choose the Right Equipment and Use It Properly

- ◆ Follow manufacturers' instructions and code requirements when installing and operating cooking equipment.
- ◆ Plug microwave ovens and other cooking appliances directly into an outlet. Never use an extension cord for a cooking appliance, as it can overload the circuit and cause a fire.

Watch What You Heat

- ◆ The leading cause of fires in the kitchen is unattended cooking.
- ◆ Stay in the kitchen when you are frying, grilling, or broiling food. If you leave the kitchen for even a short period of time, turn off the stove.
- ◆ If you are simmering, baking, roasting, or boiling food, check it regularly, remain in the home while food is cooking, and use a timer to remind you that you're cooking.
- ◆ Stay alert! To prevent cooking fires, you have to be alert. You won't be if you are sleepy, have been drinking alcohol, or have taken medicine that makes you drowsy.

Keep Things That Can Catch Fire and Heat Sources Apart

- ◆ Keep anything that can catch fire - potholders, oven mitts, wooden utensils, paper or plastic bags, food packaging, towels, or curtains - away from your stovetop.
- ◆ Keep the stovetop, burners, and oven clean.
- ◆ Keep pets off cooking surfaces and nearby countertops to prevent them from knocking things onto the burner.
- ◆ Wear short, close-fitting or tightly rolled sleeves when cooking. Loose clothing can dangle onto stove burners and catch fire.

HEATING Safety

- ◆ Have your chimney or wood stove inspected and cleaned annually by a certified chimney specialist.
- ◆ Keep anything that can burn at least three feet away from heating equipment, like the furnace, fireplace, wood stove, or portable space heater. Clear the area around the hearth of debris, decorations and flammable materials.
- ◆ Leave glass fireplace doors open while burning a fire. Leaving the doors open ensures that the fire receives enough air to ensure complete combustion and keeps creosote from building up in the chimney.
- ◆ Close glass doors when the fire is out to keep air from the chimney opening from getting into the room. Most glass fireplace doors have a metal mesh screen which should be closed when the glass doors are open.
- ◆ Keep air inlets on wood stoves open, and never restrict air supply to fireplaces. Otherwise you may cause creosote buildup that could lead to a chimney fire.
- ◆ Have a three-foot "kid-free zone" around open fires and space heaters.
- ◆ Remember to turn portable heaters off when leaving the room or going to bed.

Fire Safety Sheet

STATE

FIRE MARSHAL

Smoke & CO Alarm Safety Tips

Install smoke alarms in every bedroom, outside each separate sleeping area and on every level of the home, including the basement. Interconnect all smoke alarms throughout the home. When one sounds, they all sound.

Test alarms at least monthly by pushing the test button.

Replace batteries in all smoke alarms at least once a year. If an alarm "chirps", warning the battery is low, replace the battery right away.

Replace all smoke alarms, including alarms that use 10-year batteries and hard-wired alarms, when they are 10 year old or sooner if they do not respond properly.

CO alarms should be installed in a central location outside each sleeping area and on every level of the home

**HOLIDAY DECORATING Safety**

Be careful with holiday decorations. Choose decorations that are flame resistant or flame retardant.

Keep lit candles away from decorations and other things that can burn.

Some lights are only for indoor or outdoor use, but not both.

Replace any string of lights with worn or broken cords or loose bulb connections. Connect no more than three strands of mini light sets and a maximum of 50 bulbs for screw-in bulbs. Read manufacturer's instructions for number of LED strands to connect.

Use clips, not nails, to hang lights so the cords do not get damaged.

Keep decorations away from windows and doors.

Blow out all candles when you leave the room or go to bed. Avoid the use of candles in the bedroom and other areas where people may fall asleep.

HOLIDAY ENTERTAINING

Test your smoke alarms and tell guests about your home fire escape plan.

Keep children and pets away from lit candles.

Keep matches and lighters up high in a locked cabinet.

Stay in the kitchen when cooking on the stovetop.

Ask smokers to smoke outside. Remind smokers to keep their smoking materials with them so young children do not touch them.

Provide large, deep ashtrays for smokers. Wet cigarette butts with water before discarding.

Basic Fire Escape Planning

Your ability to get out depends on advance warning from smoke alarms and advance planning.

Pull together everyone in your household and make a plan. Walk through your home and inspect all possible exits and escape routes. Households with children should consider drawing a floor plan of your home, marking two ways out of each room, including windows and doors. Also, mark the location of each smoke alarm.

Everyone in the household must understand the escape plan. When you walk through your plan, check to make sure the escape routes are clear and doors and windows can be opened easily.

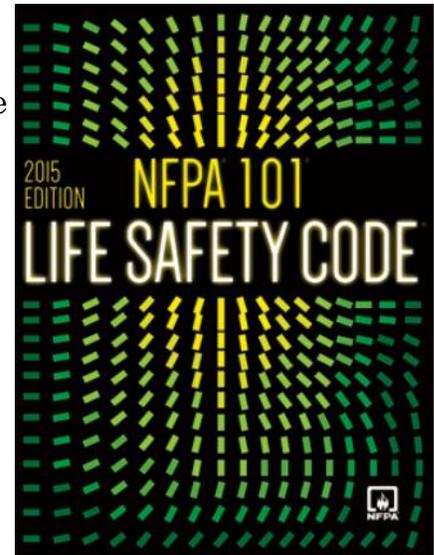

Tell guests or visitors to your home about your family's fire escape plan. When staying overnight at other people's homes, ask about their escape plan. If they don't have a plan in place, offer to help them make one.

Once you're out, stay out! Under no circumstances should you ever go back into a burning building. If someone is missing, inform the fire department dispatcher when you call. Firefighters have the skills and equipment to perform rescues.

Vermont Fire & Building Safety Code Update

The Division of Fire Safety has begun the process to update the 2012 Vermont Fire & Building Safety Code. The Division will be adopting the 2015 editions of the Life Safety, Fire and Building Codes and all related reference codes. This process will take the Division the next few months to complete with an anticipated effective date of July 1, 2016. The Division has been conducting a preliminary review of the codes and comparing changes to the Vermont Rules. I will keep you updated as the process moves forward.

The holidays are upon us again, with them come the cold weather, shorter days, and the hazards related to snow and ice. For many of us preparing for winter is an annual ritual which we do by instinct without giving much thought to the extra hazards which the holidays and the weather bring with them. Included is a list of items we may want to be thoughtful about in the coming days.

- **Christmas Trees** are a major concern for fire safety personnel; many commercial occupancies are limited to use of a tree. Here are some tips that will help you keep your tree safe for the holidays:
 - Think about updating your lights, holiday lighting are designed to be used on a temporary basis and can become a hazard if overused, also the new LED lighting eliminates the heating issue and are very energy efficient.
 - Water your tree daily, a dry tree is a flammable tree.
 - Keep your tree away from any heat source, heaters, wood stoves or candles.

- **Candles** are the cause of many accidental fires this time of the year, please use with care and follow these suggestions:
 - Always keep candles away from flammable material such as curtains and clothing.
 - Never leave lit candles unattended.
 - Consider using alternatives devices like LED ornamental lighting

Continued:

- **Heating Systems and Chimney Vents** require annual maintenance for both efficiency and safety. You should consider following these simple rules:
 - Have your heating appliance serviced at least every 2 years.
 - Inspect your chimney or vent system annually, depending on your fuel this may need to be done more often.
 - Always use and maintain the heating device as per the manufacturers requirements.

- **Smoke and CO Detectors** are the most important safety device a person can have in their home but they are only good if they work. Inspecting your detectors is simple and should be done at least once a month, please do these simple checks:
 - Make sure the batteries have been replaced, we recommend replacing them when you change your clocks.
 - Push the test button on the alarm, if it does not alarm sound you may need to replace the detector.
 - If you are receiving false alarms with your detector it may need to be relocated, following the manufactures installation guidelines will help minimize false alarms.

- **Snow and Ice** bring many hazards while walking and driving, but they also bring hazards to your home and office which may need to be addressed:
 - All exits should be cleaned and maintained in case the main exit becomes inaccessible during an emergency, this should include the removal of snow and ice to allow for use by you and others.
 - Please check your vents and chimneys from being blocked after a heavy snowstorm, a blocked vent can cause the exhaust to backup in your home creating a possible Carbon Monoxide hazard which could be deadly.
 - Be aware of heavy snow and ice buildup on roofs of your building, the building is designed to withstand a normal snow load but an excessive buildup can cause collapse.

Following these guidelines could help keep you and your family safe this winter. For additional information you can contact your local fire department, your insurance company, contact the State of Vermont, Division of Fire Safety at 800-640-2106. SEASONAL DECORATIVE ITEMS and CHRISTMAS TREES

Requirements of the Vermont Fire and Building Safety Codes

NFPA 1 – 10.14 Combustible Vegetation.

Combustible vegetation, including natural cut Christmas trees, shall be in accordance with Table 1:10.14.1.1

Combustible Vegetation: In other than Health Care, Detention and Correctional occupancies, combustible vegetation, including natural cut Christmas trees otherwise prohibited under table 10.14.1 shall be permitted when located in areas protected by an approved automatic fire sprinkler system

Table 10.14.1.1 as amended under Vermont Fire & Building Safety Code

Occupancy	No Natural Trees Permitted	Cut Natural tree PERMITTED with A sprinkler system	Cut Natural tree PERMITTED without A Sprinkler system	Balled tree Permitted
Ambulatory Health care		X		X
Apartment buildings		Within Unit	Within Unit	X
Assembly		X		
Board and Care		X		
Business		X		X
Day-care		X		X
Detention and Correctional	X			
Dormitories		X

Hotels		X		
Industrial		X	X	X
Lodging and rooming		X		X
Mercantile		X		X
One and Two Family		X	X	X
Storage		X	X	X

Provisions for Natural Cut Trees.

Where a natural cut tree is permitted, the bottom end of the trunk shall be cut off with a straight fresh cut at least 1/4 in. (13 mm) above the end prior to placing the tree in a stand to allow the tree to absorb water. 1:10.14.9.1

The tree shall be placed in a suitable stand with water. 1:10.14.9.2

The water level shall be maintained above the fresh cut and checked at least once daily. 1:10.14.9.3

The tree shall be removed from the building immediately upon evidence of dryness. 1:10.14.9.4

Electrical Fire Safety.

Extension cords shall be plugged directly into an approved receptacle, power tap, or multi-plug adapter and shall, except for approved multi-plug extension cords, serve only one portable appliance. 1:11.1.7.1

The ampacity of the extension cords shall not be less than the rated capacity of the portable appliance supplied by the cord. 1:11.1.7.2

Additional information on back

CODE INFORMATION SHEET

This sheet is designed to provide information to enhance the public safety of all Vermonters. This fire safety sheet is not an all-inclusive list of state laws or additional code requirements that may apply. This educational resource sheet does not carry the force of legal opinion and was developed by the Vermont Division of Fire Safety, with information provided by The U.S. Fire Administration, Centers for Disease Control and Prevention, and the National Fire Protection Association (NFPA). For additional information please visit www.firesafety.vermont.gov

DFS CODE INFORMATION SHEET**SEASONAL DECORATIVE ITEMS and CHRISTMAS TREES****Electrical Fire Safety, cont.**

The extension cords shall be maintained in good condition without splices, deterioration, or damage. 1:11.1.7.3

Multi-plug adapters, such as multi-plug extension cords, cube adapters, strip plugs, and other devices, shall be listed and used in accordance with their listing. 1:11.1.5.1

Extension cords and flexible cords shall not be affixed to structures; extend through walls, ceilings, or floors, or under doors or floor coverings; or be subject to environmental or physical damage. 1:11.1.7.5

Temporary electrical power and lighting installations shall be permitted for a period not to exceed 90 days for holiday decorative lighting and similar purposes. [70:527.3(B)] 1:11.1.8.3

Provisions for Flame Resistance or Fire Residence.

Artificial vegetation and artificial Christmas trees shall be labeled or otherwise identified or certified by the manufacturer as being fire retardant. 1:10.14.3.1

Such fire retardance shall be demonstrated by each individual decorative vegetation item, including any decorative lighting, in an approved manner. 1:10.14.3.2

Vegetation and Christmas trees shall not obstruct corridors, exit ways, or other means of egress. 1:10.14.4

Only listed electrical lights and wiring shall be used on natural or artificial combustible vegetation, natural or artificial Christmas trees, and other similar decorations. 1:10.14.5

Electrical lights shall be prohibited on metal artificial trees. 1:10.14.6

Open flames such as from candles, lanterns, kerosene heaters, and gas-fired heaters shall not be located on or near combustible vegetation, Christmas trees, or other similar combustible materials. 1:10.14.7

Combustible vegetation and natural cut Christmas trees shall not be located near heating vents or other fixed or portable heating devices that could cause it to dry out prematurely or to be ignited. 1:10.14.8

**Additional Holiday Decorating Safety Tips**

The use of holiday decorations such as Christmas trees, garlands, electric lights and candles can increase the incidence of holiday fires. Following a few simple fire safety tips can help ensure that you and your loved ones have a fire-safe holiday season:

- **Make sure your natural tree is fresh (fresh needles won't break when you bend them)**
- **Cut off one to two inches of the trunk and place it in a stable holder keeping the holder full of water.**
- **Keep the tree away from sources of heat to prevent your tree from drying.**
- **Use only flame-proof listed decorations and check the wiring on all your electrical decorations before you put them up.**
- **Do not overload electrical outlets or extension cords. Do not link more than three light strands unless the directions indicate it is safe.**
- **Never put tree branches or needles in a fireplace or wood burning stove. Dry needles and branches will spark when ignited and may ignite nearby combustibles.**
- **The best way to dispose of your tree is by taking it to a recycling center or having it hauled away by a community pick-up service.**
- **As you're putting away electrical light strings, take time to inspect each for flaws. Throw out light sets if they have loose connections, broken or cracked sockets or frayed or bare wires.**
- **Do not place a faulty set of lights back into the storage box for next year's use, replace damaged light strings with new energy-efficient LED lights.**
