Schools That Participated This Year

- Mater Christi School
- Williamstown Elementary School
- Monument Elementary School
- Newbury Elementary School
- Richford Elementary School
- Robinson Elementary School
- Underhill Central School
- Bennington Elementary School
- Bethel Elementary School
- Rutland Intermediate School
- Shrewsbsbury Mountain School
- Shelburne Community School
- Clarendon Elementary School
- Franklin Central School
- Fayston Elementary School
- Castleton Elementary School
- Stowe Elementary School
- Bristol Elementary School
- Lincoln Community School
- Home School - Fairfax

JULY

SOPHIA HINTON
Castleton Elementary School
Ms. Grace Redding, Teacher

AUGUST

AMAYA FREUND
Lincoln Community School
Deb Mager-Rickner, Teacher

SEPTEMBER

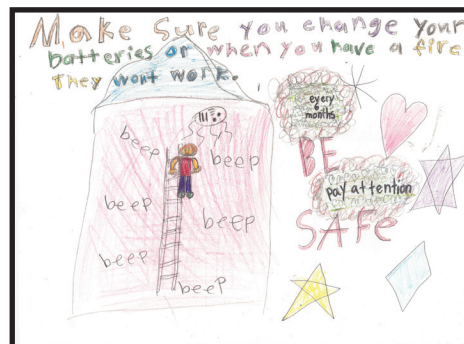

MARLEY BARCLAY
Rutland Intermediate School
Mrs. Lori Kramer, Teacher

OCTOBER

MADDALYN LAFOUNTAIN
Monument Elementary School
Colleen Marcoux, Teacher

NOVEMBER

EMMA TAYLOR
Castleton Elementary School
Mrs. Becky Lanfear, Teacher

DECEMBER

OAKLEY GEBO
Bristol Elementary School
Deb Mager-Rickner, Teacher

THE 32ND ANNUAL 2023 ROBERT HOWE FIRE SAFETY CALENDAR

Student Artists

This calendar is produced from the winning posters from the statewide fire safety poster contest that is held during Fire Prevention Month

Do Your Part to Make Everyday a Fire Safe Day
firesafety.vermont.gov

HOME FIRE SAFETY GUIDE

The best way to fight a fire is to prevent it from happening in the first place. There are several things families can do to lessen the chances of a fire starting in their homes.

SMOKE AND CO ALARMS

- Install smoke alarms in every sleeping room, outside each separate sleeping area, and on every level of the home. Follow the manufacturer's instructions for placement and mounting height.
- Install a CO alarm in a central location outside each separate sleeping area, on every level of the home.
- Test them monthly.
- Replace the battery at least once a year.
- Never disable your detector.
- Replace smoke and CO alarms that are older than 10 years with new photoelectric AC/DC interconnected detectors.

HOME FIRE ESCAPE PLANS

- Develop a floor plan of your home – identifying all exits (doors and windows) and two ways out of each room. Children, older adults, and people with disabilities may need assistance to wake up and get out. Make sure that someone will help them.
- Define an outside meeting place (e.g., neighbors or tree) where everyone can safely meet.
- Practice your escape plan so that everyone knows what to do in an emergency.
- Keep doors closed to help contain the fire and minimize smoke from spreading throughout your home.

IN THE EVENT OF A FIRE

- Crawl Low Under Smoke. Remember that in a fire, heat and smoke rise. If you have to escape through smoke, crawl low under the smoke keeping your head just off the floor area where the air is cleaner and cooler.
- Get out & Stay Out! Never go back into a home that is on fire.
- Call 9-1-1 after you've left the house, from outside.

ALTERNATIVE HEATERS

- Use heaters only in well-ventilated rooms.
- Place heaters where they will not be knocked over easily.
- Do not use heaters to dry clothing or other items.
- Keep heaters at a safe distance from curtains, furniture and all combustibles.

WOODSTOVES AND FIREPLACES

- Only use seasoned wood, and never use green wood, artificial logs or trash.
- Always use a protective screen.

- Clean interiors, hearths and have your chimney professionally cleaned and inspected every year.
- All heaters need space. Keep anything that can burn at least 3 feet away from heating equipment.
- Allow ashes to cool before disposing of them. Place ashes in a tightly covered metal container and keep the ash container at least 10 feet away from the home.

SAFE COOKING PRACTICES

- Don't leave food unattended on the stove.
- Keep dangling clothing away from burners.
- Keep appliances clean and free of grease and crumbs.
- Keep towels, curtains and other combustibles away from the stove.
- Make sure the stove is off and small appliances are unplugged before going to bed.

CHILDREN AND FIRE SAFETY

- Keep lighters and matches away from children.
- Teach children how to call for emergency assistance.
- Use safety plugs in electrical outlets.

ELECTRICAL WIRING

- Replace wiring or extension cords if it's cracked, damaged or frayed.
- Do not place wiring under rugs, over nails or in high traffic areas.
- Avoid overloading outlets and make sure they stay cool to the touch.
- Keep covers over electric outlets and avoid exposed wiring.
- Use extension cords on a temporary basis and use cords that are sized to handle the load.

FIRE SAFETY FOR THE RURAL HOMEOWNER

- Post home address signs that are clearly visible from the road.
- Provide emergency vehicle access with properly constructed driveways and roadways, at least 12 feet wide with adequate turnaround space.
- Make sure water sources, such as hydrants and ponds, are accessible to the fire department during the winter.

FIRE SAFETY TECHNOLOGY

- Only adults who know how to use portable fire extinguishers should use them. Keep a fire extinguisher handy, especially near the kitchen, place it close but not in the kitchen.
- Consider installing residential fire sprinklers.

The Essentials of Fire Prevention

PREVENTION

- Maintain heating equipment and chimneys by having them cleaned and inspected annually by a qualified professional.
- Routinely perform a simple visual home safety inspection and repair any problems.
- Be careful when using candles or any open fire.
- Follow manufacturer's instructions and any code requirements for equipment and use the equipment properly.
- Check electrical cords for cracks, breaks, damage, or overheating. Repair or replace when needed.

DETECTION

- Install photoelectric smoke alarms that are hard wired, with a battery back up, in every sleeping room, outside each separate sleeping area, and on every level of the home, including the basement.
- Install carbon monoxide alarms close to where you sleep.
- Interconnect all smoke alarms throughout the home.
- Maintain alarms by regular testing, cleaning and replace the batteries twice a year.

ESCAPE

- Identify at least two ways out of every room. Make sure all doors and windows that lead outside open easily.
- Make a home escape plan. Draw a floor plan of each level of the home, discuss and practice it with all members of your household.
- Have a plan for anyone who may need assistance in your home, such as young children, older adults and people with disabilities.

SUPPRESSION

- For small fires keep a fire extinguisher handy and know how to use it.
- If you are building or remodeling your home, install a home fire sprinkler system.
- If you live in a rural area, locate the closest reliable water supplies like a dry hydrant, pond or river. Provide clear year-round access to water supplies that might be required for firefighting.

Now is the time to get fired up for next year's Fire Safety Calendar

Each year in recognition of fire prevention month, the Division of Fire Safety sponsors a statewide fire safety poster contest. The poster contest is open to all third-grade students. At the end of October panels of judges choose thirteen posters to appear in the next calendar. Thousands of calendars are printed and delivered to schools throughout the state.

Students can work on the posters before or on fire prevention week, depending on the schools schedule they should prepare posters on white paper not exceeding 12 by 20 inches in size with the students' name, teachers name and school on the back. Posters must be submitted flat to the division of fire safety by the end of October to be included in the judging for the next calendar.

For additional information on the Robert Howe Fire Safety Calendar program, or how your organization can help support this program, contact the:

Vermont Division of Fire Safety
Central Office
45 State Dr.
Waterbury, VT 05671-8200

or www.firesafety.vermont.gov

Home Fire Escape Plan

Memorize your fire department's emergency phone number and write it here: _____

Use the space below to create your home fire escape plan.

- Draw a floor plan or a map of your home. Show all doors and windows.
- Mark two ways out of each room.
- Mark all of the smoke alarms with **SA**. Smoke alarms should be on every level of your home. Make sure there is an alarm outside every sleeping area.
- Pick a family meeting place outside where everyone can meet.
- Remember, practice your plan at least twice a year!

Sparky® is a trademark of the NFPA

Check out www.sparky.org for fire safety games and activities.

Grown-ups: Children don't always wake when the smoke alarm sounds. Know what your child will do before a fire occurs. Get more information on smoke alarms and escape planning at www.nfpa.org/factsheets.

Fire is FAST!
 There is little time to escape. It only takes minutes for thick black smoke to fill your home.

Fire is HOT!
 Heat is more threatening than flames. Room temperature can rise to over 1,000 F at eye level.

Fire is DARK!
 Fire isn't bright, it's pitch black. Fire starts bright, but quickly produces black smoke and complete darkness.

Fire is DEADLY!
 Smoke and toxic gases kill more people than flames do.
